OUTPUTS

CO-3

Sample Output

```
PetCare Smart Veterinary Clinic System
--------------------------------------

BFS Traversal: 0 1 2 3 4

DFS Traversal: 0 1 2 3 4

Minimum Spanning Tree (Prim's Algorithm):
Edge                  Weight
Vaccination - Consultation    1
Registration - Vaccination    2
Consultation - Pharmacy       5
Pharmacy - Emergency          2

Total Minimum Cost = 10
```

CO-2

Output

```
==========================================
   PETCARE HEALTH RANGE QUERY SYSTEM
==========================================

Pet Health Scores:
85 72 90 60 78 95 68 88

Range Query:
Minimum Health Score from index 2 to 6 = 60

Updating Health Score...
Pet at index 3 health score changed from 60 to 55

After Update:
Minimum Health Score from index 2 to 6 = 55

==========================================
Time Complexity:
Segment Tree Construction : O(n)
Range Query               : O(log n)
Update Operation          : O(log n)
==========================================
```

CO-1

Sample Output

```
Pet Records:
Pet ID: 101 | Pet Name: Tommy
Pet ID: 102 | Pet Name: Lucy
Pet ID: 103 | Pet Name: Rocky
Pet ID: 104 | Pet Name: Max
Pet ID: 105 | Pet Name: Bella

Pet Found: Rocky

After Deletion:
Pet ID: 101 | Pet Name: Tommy
Pet ID: 103 | Pet Name: Rocky
Pet ID: 104 | Pet Name: Max
Pet ID: 105 | Pet Name: Bella
```
